

# Know what's below. Call before you dig.

**Planning to dig? Call 811 before you do!**

- Make the call. State law requires that you notify the North Carolina One Call Center by calling **811** to have your utilities located before you begin any excavation work.
- Wait. Technicians have two working days following the day you call **811** to mark the location of utility lines on your property. It's a free service.
- Respect the markings to ensure your safety.
- Dig with care. If you accidentally hit a natural gas pipeline, call PSNC Energy immediately at **1-877-776-2427**.

Calling 811 is a free service and it's the law. For more information on digging safely, visit [psncenergy.com/gassafety](http://psncenergy.com/gassafety).
